Stereo DVR with IP Connection

Stereo DVR
W/IP Connection KSR-HDVR

- Analog or Network Cameras - Inputs
- Video & Audio Recording
- Quick Deployment
- Plug & Play
- Up to 2 TB Optional Drive
- Play Back Built-in
- USB Port for Quick Down Load
- H-264 Format

This DVR converts any analog camera to an intelligent, high resolution surveillance system. The analog A/V signal from the camera is captured, compressed and stored to an external USB storage media using H.264 video and MP3 audio formats.
When an IP camera is connected to an KSR-HDVR, all of its features are retained, and the IP camera can be fully controlled through its own PC/Mac application in a transparent manner. The DVR further adds to the functionality of the IP camera by offering the store and forward A/V stream feature. It records the Motion JPEG video stream of an IP camera along with its audio footage to an external USB storage device connected to the DVR. The stored contents can be streamed in H.264 format, for remote viewing.

KSR-HDVR $2400.00

Digital Microwave Section

With Audio --

Miniature Video Transmitter
KST-1000

2 Watt Option

- Wide Frequency Range (In Bands)
- 2 Cubic Inches
- COFDM Digital Modulation
- Low Latency (< 44mS)
- MPEG-2 (MPEG-4 Optional)
- 16 Channels
- Wireless Remote Control Unit*
- 2 Watt Amplifier Available*
- *Optional
- 12 Vdc Operation

This new video microwave transmitter is ideal for body worn or UAV airborne applications. A key feature of this transmitter is the size, high quality, low power consumption (4 Watts), and low latency.
What is great about digital transmission is the fact that it is immune to multipath interference and creates clear, crisp video in the most difficult of terrains. One of our customers is getting 14 miles of clear video with this system using only omni 5dB gain antennas. HD is also <u>not</u> out of the picture with some of our new developments.

High Power Video COFDM Transmitter
MODEL # KST-VCHPT

- Wide Frequency Range (900 Mhz to 5.0 Ghz)(In Bands)
- COFDM Digital Transmitter
- Bandwidths from *2.5 to 8 Mhz
- Low Latency (40 mS)
- Scrambling*ABS/AES 128 or 256
- * Optional

This new video microwave transmitter was designed for helicopter and large UAV applications where long distance video transmissions are required. This new transmitter supports the new narrow band modulation as well as the standard 6, 7, or 8 Mhz bandwidths.
The transmitter has one unique function in that all parameters can be modified or changed on the fly such as R.F. Power.

- NTSC or Pal Format
- Video Output Available

BTS is a state of the art uncooled thermal imaging binocular designed to meet demanding needs of law enforcement and security professionals. BTS offers unsurpassed performance when used for medium range surveillance, search and rescue operations, perimeter control, and vehicle identification in addition to a wide variety of other applications. Regardless of ambient light conditions, smoke or haze, BTS detects even the slightest temperature differences of everything in the field of view and provides the user clear “white hot” or “black hot” images of what otherwise would be invisible to the naked eye.
The imager can be powered by lithium CR123 batteries or it can be connected to an external 12 VDC power source or AC/DC adapters. Built-in electronics automatically selects external power when it is available and preserves battery life to the greatest extent possible.

GPS Section Tracking

Little Joe
KST-400

Turn Any Analog Camera & Microphone into an IP Connection

- IP Compatibly
- 12 Vdc
- Video & Audio Input
- Quick Deployment
- Network Compatibly
- SD Card for local storage

$1295.00
$1495.00 W/Camera

Now! For the first time, a IP video transmitter that can be deployed quickly into a network. Hide your favorite covert camera inside your working network. Assign "Little Joe" an IP address, plug in your camera and your on the air. Little Joe has an output power of 400 mW so it should have no problem of connecting to your network.

Add a gain antenna and improve your operating distance.

The SD card is provided as an extra feature to record video & audio on a local basis.

Ask about a kit price. Camera, Mic & Little Joe.

See website for latest application data!

KSR-71 USB WiFi Transceiver

$250.00

- 250 mWatts @ 11 b/g 2.4 Ghz
- 65 mWatts @ 11a 5.8 Ghz
- 54 Mbps
- Antenna Ports, 2 Antennas Included
- 300 to 1000+ Meters (Range)
- Compatible with our systems
- Extend the Range of Your Computer
- Part of our WiFi Systems (Little Joe series)

This new product extends the range of most laptop computers. Fully compatible with our Little Joe series of camera converters. By plugging this unit into your computer, and using our special magnet mount antennas, one may set-up covert operations using of the shelf analog cameras & microphones to your laptop computer in a local area.

Range is dependent upon the noise floor where you are going to set-up the operation and the gain of the antennas being used. We suggest that you load www.metagreek.net. It's free. A program on your laptop allows you to check out the area for R.F. Interference. Something no one tells you about. It's a program called "Inssider" A must for IP operations.

Listen Through Walls!

$3200.00

Audio Tactical Kit
TAK-1

The TA-17 was developed in response to the varied needs of law enforcement personnel for audio monitoring. It is a high gain stereo amplifier with lower noise and distortion than any other unit on the market. Recorder outputs may be adjusted manually or by automatic level control (ALC). This will drive any recorder and cable or transmitter feed to a command post or back-up team. An LED provides warning of both signal overload and low battery. The extremely advanced ALC is capable of a wide range of adjument without pumping or
distortion. Super high efficiency circuits assure long operating life from the internal 9 volt battery while providing plenty of drive for two sets of stereo headphones. Through careful attention to detail Daniel Technology designed into the TA-17 many features which make it a flexible and reliable tool for a wide range of law enforcement technical operations. Theamplifier is ideal for hostage situations, barricaded subjects, and covert operations. A wide range of general purpose and specialized types of microphones

$3600.00

Stereo Audio Tactical Kit
SAK-1

Also known as a “contact mic”. When entry is not possible and you need to hear what is being said as well where people are located, this system is essential! Hearing what is happening on the other side of a wall, the floor above, or the floor below your location can provide the intelligence you need to safely conclude the incident. The SAKTM non-invasive audio recovery kit has everything you require to quickly deploy a through-the-wall listening system. The entire system is tuned perfectly for maximum voice intelligibility and stereo imaging.

See “Little Joe” application for listening through the window with our window microphone.

Features:

- Covert operations
- Battery powered
- Audio through walls
- Audio through floors
- Audio through ceilings

Kit Includes:

- Low Noise Stereo Amplifier
- Low noise electronic interface
- Accelerometers
- Mounting hardware
- Wall scanner
- Headphones

Covert Camera Section
Periscopes

R/4 360° Rotation
Standard $6785.00

- 360 degree Viewing Area
- Low Silhouette-- 4” Max
- Vertical Viewing of +/- 30 Degrees
- 12 Vdc Operation
- New Smaller Camera Mount
- Remote Controllable

This new R/4 periscope is similar to the R/3 except the over all size has been reduced to give more clearance and room in the surveillance van.
The next advantage is the periscope doesn’t need to be raised all the way to get a great picture. Just raise it just enough to get your picture and view away. The new mirrors are of the highest quality. Flat within a 1/4 of a wave length. Thus, reducing distortion when zooming in on the target.
The new hand controller incorporates a joy stick for ease of operation.
The camera mount will handle our new 15x300.

See Our 2012 Surveillance Van Catalog for Products

R/5 Continues 360° Rotation
W/Slip Rings $9823.00

- 360 degree Viewing Area
- Low Silhouette-- 4” Max
- Vertical Viewing of +/- 30 Degrees
- 12 Vdc Operation
- New Smaller Camera Mount
- Remote Controllable

http://www.covert-systems.com/vans/pdf/VAN%20CAT%202012.pdf

This new R/5 periscope is similar to the R/4 except the over all size has been reduced to give more clearance and room in the surveillance van. The mail advantage to the R/5 is that is uses slip rings so that no cables will wind up in remote operations.
The next advantage is the periscope doesn’t need to be raised all the way to get a great picture. Just raise it just enough to get your picture and view away. The new mirrors are of the highest quality. Flat within a 1/4 of a wave length. Thus, reducing distortion when zooming in on the target.
The new hand controller incorporates a joy stick for ease of operation.
The camera mount will handle our new 15x300 lens as well as a Canon XL-2 camcorder.
